

3D-TRILOGYICE combines the proven benefits of three wavelengths, achieving maximum results and versatility when compared to a single wavelength. This powerful combination of different penetration and absorption levels of wavelengths, combined with the speed of delivery, ensuring that you will be receiving one of the safest and most comprehensive hair removal solutions available.

ADVANCED LASER HAIR REMOVAL

Power of 3

3D - Trilogyice provides comfortable and effective laser hair removal on all skin types with maximum effect at an affordable price.

ONE HANDPIECE DELIVERING
THREE LASER WAVELENGTHS.
ALEXANDRITE, DIODE AND
ND YAG LASER.

Benefits of the Treatment:

- Super fast treatment
- Precision application
- Safe and virtually painless
- Suitable for all skin types including tanned
- Affordable
- Unprecedented results

The science

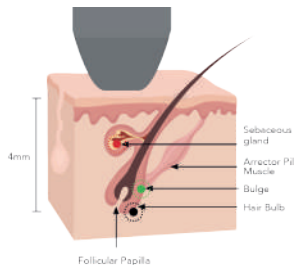

3D - Trilogice removal employs volumetric heating of the dermal tissue. This heat can alter the stem cell function of the hair. The fluence of each pulse is delivered at a low power and the pulses are delivered rapidly to collectively heat the dermal tissue and thermally injure the hair follicle.

The melanin content in the hair attracts the pulses to conduct the heat rising the temperature of the follicle above the temperature of the dermal tissue, resulting in permanent hair reduction.

FAQ's

What is unique about 3D-Trilogice treatment?

There is no doubting the evidence proving the benefits in utilising three laser wavelengths in a single handpiece which simultaneously targets different tissue depths as well as anatomical structures within the hair follicle. With the combination of different penetration and absorption levels of these wavelengths, combined with the speed of delivery, you can be assured you will be providing one of the safest and most comprehensive hair reduction solutions today.

Is 3D-Trilogice safe?

3D-Trilogice in motion protocol ensures safe, comfortable and effective hair removal on all skin types. The energy pulses of the trilogy in motion protocol, works by gradually heating the dermis and damaging hair follicles whilst avoiding injury to the surrounding tissue.

The Trilogy in motion protocol of moving the applicator over the treatment area quickly enables full coverage whilst the contact cooling system ensures virtually pain free and effective hair reduction.

What will I experience during treatment?

During treatment, the handpiece will be used in a gliding forward and backward motion over the skin. You may experience a warming sensation in addition to a slight pinkness to the skin. The treatment itself is virtually painless.

Who is a good candidate for the 3D-Trilogice treatment?

The treatment is suitable for anyone who has unwanted hair in various areas of the face and body. The technology can treat hair colour from Golden Blonde through to Black hair. We can advise further during your consultation to determine your suitability for treatment.

What areas can be treated?

3D-Trilogice can practically be used anywhere where there is hair; underarms, legs, arms, face, pubic area, chest, back and buttocks.

How many treatments are required?

This varies for each client and a treatment program will be devised upon consultation. A course of 6 -8 treatments is typically recommended.

How long does the treatment take?

The time varies depending on the area being treated but typically range from 15 minutes up to 45 minutes per application.

How long until I can see results?

Results can be seen from the first session and improve throughout the course of treatments.
